Professional Summary

Results-driven Data Engineer with 3.5 years of experience building and optimizing scalable data pipelines using PySpark, SQL, Azure Databricks, and Snowflake. Proven expertise in cloud migration, ETL automation, and performance tuning. Committed to delivering high-quality data solutions that drive analytics and business growth.

Work Experience

Cognizant Technology Solutions | July 2022 – Present

Associate – Data Engineer | Chubb Insurance (Producer) | Nov 2025 – Present

- Built scalable ETL pipelines in Databricks using PySpark and Delta Lake, processing large scale broker data in the producer domain.
- Developed notebooks to ingest, transform, and load data from Azure Synapse into staging and curated layers.
- Delivered automated datasets for reporting teams, improving reliability and reducing manual intervention.
- Integrated CI/CD practices using Git-based workflows for reliable code deployment.
- Collaborated in Agile sprints, conducting validations, peer reviews, and performance optimization.

Associate – Data Engineer | Chubb Insurance (Healthy Paws) | Jan 2025 – Oct 2025

- Migrated and developed datasets from SQL Server to Databricks and Snowflake with 100% accuracy.
- Worked on Animal Health Insurance datasets, supporting incremental and full load patterns.
- Developed notebooks and optimized PySpark jobs for Delta Lake ingestion, reducing processing time.
- Automated data loads using Databricks workflow, reducing manual effort by 90%.
- Implemented validation layers, quality checks, and CI/CD deployment pipelines for stable production releases.

Programmer Analyst – Data Engineer | Chubb Insurance (Acers Modernization) | Jul 2023 – Jan 2025

- Designed optimized Databricks workflows improving performance and reducing runtime.
- Developed reusable transformation frameworks, accelerating development and built reusable validation scripts that reduced QA effort by 40 % across multiple pipelines using PySpark and SQL.
- Designed metadata driven ingestion logic to simplify onboarding of new datasets with minimal code changes.
- Automated workflows, saving 20+ hours weekly.
- Conducted code reviews and implemented CI/CD standards, ensuring consistent deployments and version control.

Programmer Analyst Trainee – Data Engineer | PepsiCo MDIP | Jul 2022 – May 2023

- Led Teradata-to-Azure migration for multi-TB datasets.
- Built SQL scripts and Databricks notebooks, improving performance by 30%.
- Implemented automated testing, reducing defects by 40%.
- Collaborated with cross-functional teams for timely data availability.

Certifications

- Databricks Certified Associate Data Engineer
- Microsoft Certified: Azure Fundamentals (6C6ERCF5C804)
- Microsoft Certified: Azure Data Fundamentals (56D4CE1S6070)

Skills

- **Programming & Data:** SQL, PySpark, Python
- **Big Data & Cloud:** Azure Databricks, Snowflake, Azure Data Factory, Delta Lake, Azure Storage
- **Pipeline Design:** ETL Pipelines, Data Warehousing, Data Modeling, Orchestration
- **Performance:** Optimization, Shuffle Tuning, Partitioning, Data Quality, Data Validation
- **DevOps:** CI/CD Pipelines, Git, Version Control
- **Methodologies:** Agile Scrum, Sprint Planning, Peer Reviews

Education

Bachelor of Engineering in Electrical & Electronics
St. Joseph's College of Engineering, Chennai – 2022

Achievements

- Served as Secondary Team Lead at PepsiCo, guiding a 6-member team to on-time delivery.
- Received 'Working As One' award for exceptional teamwork and client appreciation.
